BlendCrete® and RubCrete concrete and masonry patching compounds are ideal for repairing surface defects including bug holes, honeycombs and cracks in cast-in-place, precast, post-tensioned and tilt-up construction.

**BlendCrete®**
- A one-component, polymer-modified, portland cement-based, resurfacer designed for smoothing and filling vertical and overhead concrete and masonry surfaces.
- Features:
  - Self curing
  - Non-shrink finish
  - No primer needed
  - Excellent coverage and easy to use
- Technical Features:
  - Applies where:
    - Vertical / Overhead
  - Wearing Surface: Resurfacer
  - Structural: Yes
  - Freeze / Thaw: Yes
  - Integrated Corrosion Inhibitor: Yes
  - Return to service: 3 hour return to service
- Placement:
  - Thickness: Feather edge to 1”
  - Working Time: 25 - 30 min @ 73 degrees °F
  - Application: Trowel / Sponge / Brush
- Compressive Strength:
  - 24 hours (psi): > 600 psi
  - 28 days (psi): 3,500 psi

**RubCrete®**
- A fast-setting, one component, polymer-modified, calcium aluminate cement-based concrete and masonry patching compound designed for vertical and overhead repair applications.
- Features:
  - Easy to shape and mold
  - Integrated corrosion inhibitor
  - Does not require forming procedures
  - Normal set time approximately 30 minutes
- Technical Features:
  - Applies where:
    - Vertical / Overhead
  - Wearing Surface: Vertical / Overhead
  - Structural: Yes
  - Freeze / Thaw: Yes
  - Integrated Corrosion Inhibitor: Yes
  - Resurfacer: Yes
  - Return to service: 3 hour return to service
- Placement:
  - Thickness: 1/4” to 2”**
  - Working Time: 15 minutes @ 70 degrees °F
  - Application: Trowel
- Compressive Strength:
  - 24 hours (psi): 4,000 psi
  - 28 days (psi): 5,500 psi

* Suitable for DOT use. Contact ProSpec® Technical Service for state approvals.
** BlendCrete® Use ProSpec® B-730 Mortar / Acrylic Additive for thicknesses of 1/4” (6 mm) to 1/2” (13 mm). Extend with 3/8” pea gravel for applications greater than 2” thick.
